

The Complete WM System is now available in a Mobile Unit– robust enough for all field conditions

The entire WM System is mounted in a tough Pelican case.

- Tour Sheet – Daily tracking of drilling activity
- Auger Sheet – Daily tracking of all sampling and installation operations
- Abandonment Sheet – Daily tracking of any abandonment activity
- Core Sheet – Digital labeling and core sheet

Included in Pelican case: computer, smart communications system, battery backup, keyboard, and printer.

Power Supply is 12V with 20 ft. cable (army connector at case, standard 12V plug at vehicle)

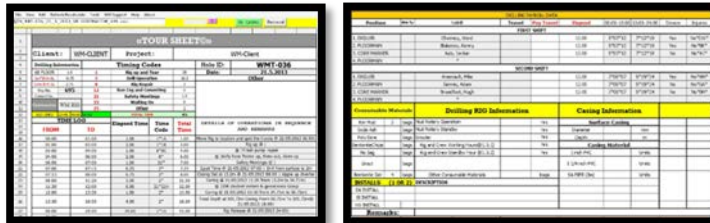

Battery backup provides continuous operation for 3 hrs.

All inputs are instantly saved (backup is created by each keystroke).

Training time ~ 45 min.

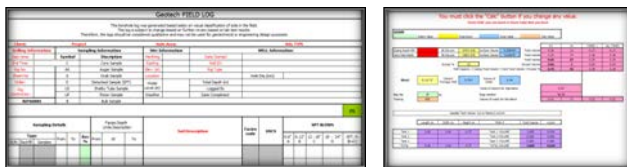

TOUR SHEET

- Full control over daily activity
- Fully customizable payroll
- Tracking of all consumables
- Increased rig operation efficiency
- Quick and easy billing to client
- Reduction of field mistakes
- Built in logistics for drilling inputs

AUGER and ABANDONMENT SHEET

- Fully customizable payroll
- Tracking of all consumables
- SPT, Shelby, Nilcon, Piezo, VW.
- Sampling: Auger, Grab, Bulk
- Automated abandonment calculations

Well Name	Current Time	Plug ID	Ground DCL	Current Log	Current DCL	MR (Meters)	FBM REPAIRS
Casing Information							
Casing Depth	Type						Corrosion Remarks
Current Plug Depth	Material DCL						Address
Cable +15%	Current Plug						Current Return DCL
90 Size	Water ID						0
Drilling ID	Strength Index						Material
90 Date	Water Content						Casing Tubed
Logging Comments	Notes						Drill bit for 90 size

CORE SHEET

- Higher quality of core labelling
- Digital labelling
- 100% removal of written mistakes
- Automated calculations
- Compatible with all core labs

Run	Time	Depth	Core	Core	Core	Core	Core	Core	Core	Core	Core	Core	Core	Core	Core	Core	Core	Core	Core	Core

EXPERIENCE:

- 17 Years in Drilling, Coring, Geotech
- Specialized in Mud Rotary, Sonic, Dual Rotary and Auger Drilling
- Over 8000 wells (all types)

MAIN SYSTEM HIGHLIGHTS

- All digital data is accessible online 24/7
- Increased rig operation efficiency
- Higher overall safety, due to more time available
